

# Introduction – Code and Concept

---

We...

- ...are an IT-Company from Munich
- ...work in the areas of Collaboration, Enterprise 2.0, Systems Integration, Identity Management Business Intelligence, and some „bespoke IT solutions“
- ...are a Novell Solution Provider & System Integrator
- ...are focused strongly on Novell Vibe, got hooked during the Teaming & Conferencing Beta program
- ...serve numerous customers in education and research, administration as well as enterprises
- ... Have strong ties to several universities
- ...have our own software label: co3tools
- ...launched ShareOnVibe in August 2012

# The Landscape - A Collaborative Ecosystem

---

[ Social | Enterprise ] Collaboration

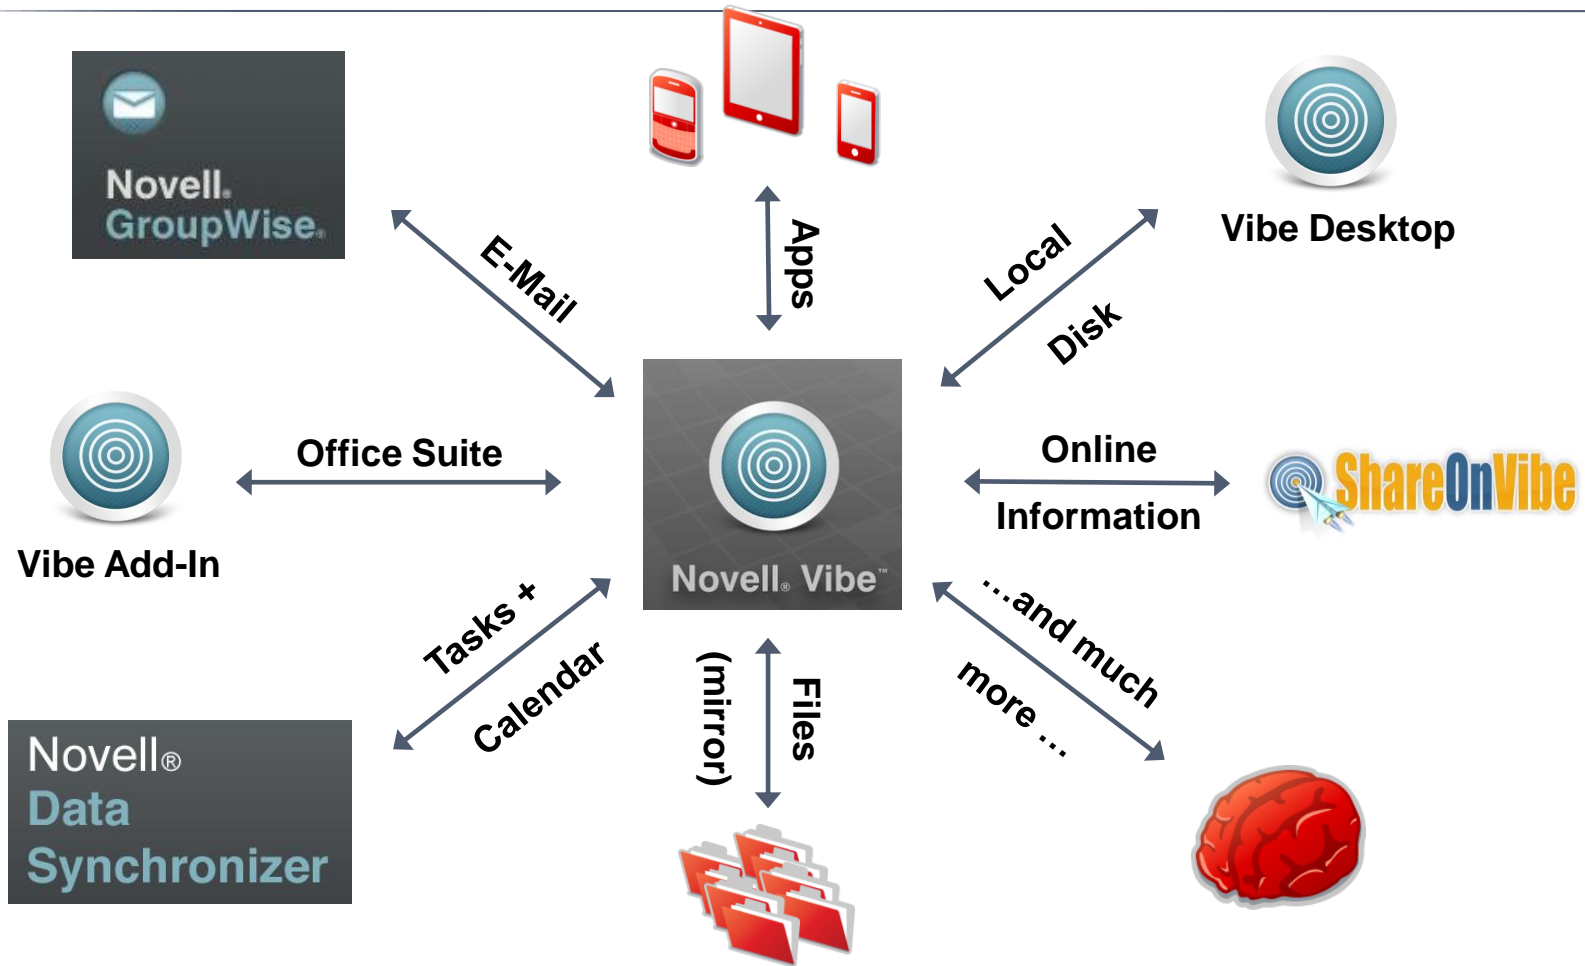

is “the big thing” – but to really get off the ground, collaboration must be

- Ubiquitous – available anytime, anywhere
- Interconnected – free choice of device, platform, tool
- At your fingertips – ready at no delay, *not* break flow
- Adaptable – ‘digital na(t)ives’ and ‘old schoolers’, unite!
- Integrated – the whole IT environment must enable it

The Novell tools are in a good position and Vibe is a centerpiece of the collaboration puzzle!

# The Novell Collaborative Ecosystem

Novell provides tools for nearly all kinds and channels of information

# Other Success Stories– The Gentleman Never Tells

---

N<sup>®</sup>

The majority of successful Vibe installations never get any publicity, because “it just works”

Our happy customers

- ~10 Installations in EDU/research, ranging from 15 to ~60.000 users
- Several sites in institutions/administration/ the public sector (a Berlin senate, chamber of commerce,...)
- Several SME (management and project consulting, facility services, advertising, marketing, IT, ...)
- Some large enterprises (manufacturing)

But are there others? Of course! Just look at the Use Case slides from us and others for BrainShare

- Large telecommunication providers
- International hotel chains
- Large retailers (e.g. outdoor equipment )
- Countless companies, institutions, schools ... and the NSA
